\*Course placement is determined in each individual area and scores may not require all course levels as listed on this flow chart. Some courses are designed to teach students the fundamental skills necessary to progress in the direction of college-level courses and may be required prior to moving into the next level of coursework. Courses listed as "pre-college level" are not counted toward the total number of credits required for degree completion. However, "pre-college level" credits are counted as part of the semester credit course load used to determine enrollment status, tuition, financial aid, and other college-related business. Please note: ENGL 025 (Spelling Development) and READ 035 (Building College Vocabulary) may be required as well, as part of the CSI placement requirements. The use of ACT scores or successful completion of college transfer coursework indicated on your official transcripts for placement may be acceptable and could exempt you from taking part or all of the COMPASS test sections. Placement test scores will be considered valid if they have been taken within three years from the date of course enrollment. For a complete COMPASS scoring scale listing, visit <http://advising.csi.edu> located under the "Resources" section. Contact your major advisor to determine which course path you should follow.
